DETAILED ACTION

Requirement for Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a lock mechanism having a superlock feature, classified in class 292, subclass 201.
 - II. Claims 18,19, drawn to a child safety mechanism having a particular release mechanism structure, classified in class 292, subclass 216.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility without the particular details of the child safety mechanism's particular release mechanism and vice versa, whereby the claims (and accordingly, the claimed inventions) are patentably distinct. See MPEP § 806.05(d).
